

About CEDEX

CEDEX is the leading and licensed EDI/API service provider in China. Besides foundational communication software for secure data transmission across various protocols, CEDEX has also self-developed and successfully delivered an intelligent container loading system, offering solutions to the global challenges of automatic unstacking, cross-dock loading, and containerization. We provides business application software systems and service platforms for BMW JIS 5300, VOLVO LDJIS, and others. By 2024, CEDEX serves a global online customer base of 43 key buyers and 8,106 suppliers. Committed to sustainable development, CEDEX has become a vital bridge in the supply chain between buyers and suppliers in China and globally.

CEDEX Overseas

CEDEX has established an EDI Network Alliance (NA) with European and American partners. CEDEX opened direct office in California to serve the growing local market invested by Chinese manufactures. CEDEX is now working closely with international logistic standard contributors (e.g. Odette International in Europe and AIAG of U.S.) to provide global authorized supply chain training(e.g. GMMOG/LE) for Chinese suppliers/buyers.

Product

CEDEX believes in Digital Supply Chain as a fully transparent information flow and product-finances flow between suppliers and buyers. The company focuses on the first push of the entire cycle and provides services to help buyers and suppliers match their information and products with financial outcomes. By using CEDEX's services and solutions, the parallelization between information flow and product-finance flows creates digital twins, where an efficient information flow empowers our customers to reduce costs in the physical world.

I. Platforms:

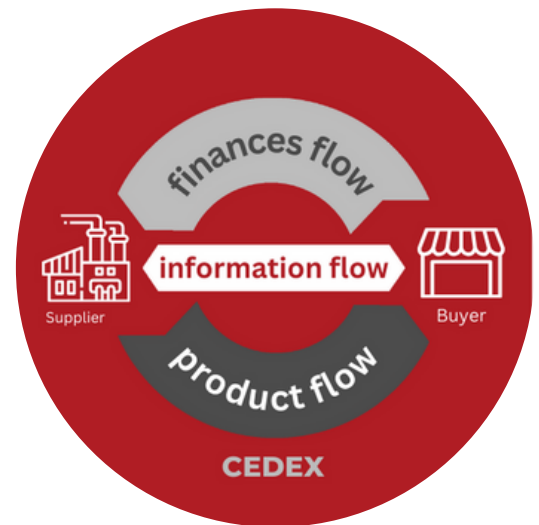

- (1)China-eAutoHub platform;
- (2)NA: Transnational EDI Network Alliance platform ;
- (3)EX3: Digital supply chain EDI application cloud platform;
- (4)IKEA supplier EDI/VMR, CLP: Container loading planning;
- (5)ENGDAT: TB scale engineering data & drawings transfer.

II. Application software solutions:

- (1)DX0: Supplier-side EDI client software;
- (2)DX1: Supplier-side EDI business integration software, ERP-Adaptor;
- (3)EX6: Buyer-side WebEDI solutions SRM;
- (4)Supply chain business integration API solutions and development tools.

III. Software tools and professional services

- (1)G/W: EDI security gateway;
- (2)dMap: EDI/API data mapping tool;
- (3)AS2/OFTP2 security data transmission tools;
- (4)Generative container planning software: **WhaleStack**
- (5)Odette International Certification and domestic CFCA digital identity certificate CA;
- (6)Unique OFTP-ID;
- (7)User account sales for MMOG.np and supports for local users;
- (8)MMOG/LE v6 globally training (certification after training).

Service

Since 2006, CEDEX has provided EDI connections and ERP integration for suppliers of large-scale industrial manufactures and retailer (e.g. Foton Motor Group, Volvo Cars, BMW, Volkswagen, Jaguar Land Rover JLR, INERGY, Haldex, Target, Costco, Walmart, Sam's Club, IKEA, etc.). Meanwhile, CEDEX connects our clients' international factories with API data communication for suppliers, buyers, and logistic carriers (e.g. Texas Instruments, Intel, FedEx, UPS, etc.) in North American.
